TO EQUIP BROOKLYN BRIDGE WITH MOVING SIDEWALK.

Novel Scheme Backed by New York Millionaires-Will Carry Passengers at Rate of Ten Miles Per Hour.

REPUBLIC SPECIAL.

New York, July 12.-It was learned to-day that behind a plan to equip the Brooklyn bridge with moving sidewalks are men of names to conjure with They have perfected organization, and if their proposition is viewed favorably by the officials of the city who have power to act they will organize a corporation under the laws of this State and become practically a local concern.

Among these men are Cornellus Vanderbilt, Stuyvesant Fish, E. P. Ripley, George W. Young, Moses Taylor Pyne, S. S. Paimer, John O'Rourke and half a dozen others, all well known in the railroad and financial world

It has been agreed by the representatives of these men that they will within one year equip the bridge with moving sidewalks at their own expense, and will pay the city \$150,000 a year for the privilege of operating them. They have agreed to charge not more than I cent a person for each crossing. According to the plans drawn by George S. Morrison, the company's consulting engineer, there will be four speeds in the sidewalks. The outer rim, on which the nassenger will first step, will move at the rate of two and one-half miles an hour, the second at five miles an hour, the third at seven and one-half miles and the fourth and main belt at ten miles an hour.

But the great success achieved by the Minister of Pinance was the vote on the conversion of the Big per cents to 3 per cents. This affects the leans raised in 1811 to meet the war indemnity. The combination planned by M. Rouvier was at once sober and elegant. He expounded it with eloquence and authority, and found a means to make the Deputies appland, not merely his culogy of the long and laborious efforts of this country, which

This success by M. Rouvier is a well-deserved revenge for the foul calumnies of which he has been too long the victim. It proves that if justice halts it still keeps its engagements with those who have patience to wait for it.

Problems for Next Chamber.

The Deputies are going away. When they return, in October, they will have the debates on the budget of 1902, which will serve as the keystone of the whole Legislature. Over 20,000 Weak Men

Regained the Vigor of Manhood from Dr. McLaughlin's Electric Belt.

Here is the snap, the vim and vigor of young manhood. Any man who wears my Elecric Belt can be a giant in mental and physical development. Thousands of men are mere pigmies of what nature intended them.

Backward, oversensitive, fearing to venture, lacking the grit, the "sand" which is the possession of vigorous manhood.

They need Electricity, which is animal vitality. It is the foundation of all vigor. It is the fuel to the engine which runs the human machine.

Electricity, as I apply it, is a source of new life to all parts of the body. VIGOR OF YOUTH FULLY RESTORED. Men, are you weak, have you pains in your back, varicocele, weak stomach, constipation, lumbago, enlarged prostate gland, or any of the results of early mistakes, excesse overwork? My method of applying electricity while you sleep at night will cure you. It fills the nerves with the fire of life. You wear my Belt while you sleep. You feel its life-giving power and can regulate it.

For twenty years I have studied Electricity as applied for the upbuild-

ing of manly strength, and my method of treatment, now tried and successful, is the result of my study and experience. Electricity is life to the weak parts, to the nerves of the body. They cannot live without it. Get back the power and make yourself a man
